-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 March 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-23 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-23 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 and 12-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brock.

Brock discloses a water irrigation system comprising a computer system, a sensing unit comprising a moisture gauge wherein the gauge comprises a collector configured to receive moisture, a flex circuit coupled to the collector wherein the flex circuit comprises a capacitor 94 wherein the capacitor is part of a resonant circuit (Column 5), wherein the collector and the flex circuit are configured such that a change in an amount of moisture in the collector alters a frequency of the resonant circuit, wherein the sensing unit is configured to assess an amount of moisture in the collector and provide output that is a function of the amount of moisture in the collector to the computer system (Column 5), wherein the computer system is configured to control irrigation of a zone to be irrigated at least partially based on the assessed amount of moisture in the collector. It would have been obvious to one having ordinary skill in the art that the device of Brock comprises a collector to receive moisture since current moisture conditions are compared to requirement parameters for irrigation. The placement of the sensing unit from the computer system as recited in claim 2 would have been a matter of design

Art Unit: 3752

preference. The device of Brock is capable of carrying out the methods of claims 18-23 since it comprises all of the structural limitations of the instant invention.

3. Claims 4-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brock in view of Dodds et al.

Dodds et al. teaches a water irrigation system using solar cells to generate power for the system. It would have been obvious to one having ordinary skill in the art at the time the invention was made of have modified the device of Brock by using a solar panel as taught by Dodds et al. to produce electricity.

4. Claims 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brock in view of Wood et al.

Wood et al. teaches using in an irrigation system a computer system comprising an infrared receiver and an infrared transceiver to monitor foliage conditions to determine moisture requirements. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device of Brock by incorporating an infrared receiver and an infrared transceiver as taught by Wood et al. to monitor moisture requirements of crops to be irrigated.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Davis D. Hwu whose telephone number is 571-272-4904. The examiner can normally be reached on 8:00-4:30. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Scherbel can be reached on 571-272-4919. The fax phone number for the organization where this

Art Unit: 3752

application or proceeding is assigned is 571-273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
